

**TOWARDS CRITERIA OF EVALUATION OF RESEARCH AND
 RESEARCHERS: STATE OF THE ART FIVE YEARS AFTER
 THE EUROPEAN CHARTER FOR RESEARCHERS**

July 2nd, 2010
Lingotto Conference Centre, Turin

Research activity is considered a prominent part of innovation and consequent wealth generation in any advanced Country, thus the need for policy makers and the wider public to get insight into the quality of researcher outputs is legitimate. However, evaluation techniques elaborated by the International Scientific Community meet a number of difficulties in the Italian context. This workshop is organized by ANPRI as a further contribution to the assessment of a road map towards an equal, internationally shared, evaluation system.

Program

**Scientific
 Committee**

Laura Teodori,
Enea, Rome, Italy

Bruno Betrò, *CNR,
 Milan, Italy*

Zofia Maciorowski,
*Curie Institute,
 Paris, France*

Robert F. Murphy,
*CMU, Pittsburgh,
 USA*
